

Curriculum		T	P	ECTS
<b>1 st Semester</b>				
HIST101	Principles of Atatürk and History of Turkish Revolution I	2	0	2
CMPE109	Fundamentals of Computing	2	1	2,5
ENG101	English For Academic Purposes I	4	0	3,5
CHE105	General Chemistry	3	2	5
PHYS101	General Physics I	3	2	6
MATH151	Calculus I	4	2	7
CMPE113	Computer Programming I	2	2	4
KRY111	Career Planning	1	0	1
<b>2 nd Semester</b>				
ENG102	English for Academic Purposes II	4	0	3,5
HIST102	Principles of Atatürk and History of Turkish Revolution II	2	0	2
CMPE114	Computer Programming II	3	2	5
MATH152	Calculus II	4	2	7
PHYS102	General Physics II	3	2	6
ISE102	Introduction to Management Information Systems	3	0	3,5
HIST221	History of Civilization	3	0	3
<b>3 rd Semester</b>				
ISE261	Business and e-Commerce	3	0	6
MATH275	Linear Algebra	4	0	6
CMPE251	Discrete Computational Structures	3	0	7
ENG201	English for Academic Purposes III	3	0	3
CMPE225	Object-Oriented Programming	3	2	8
<b>4 th Semester</b>				
CMPE226	Data Structures	3	0	8
SE212	Human-Computer Interaction	3	0	8
ENG202	English for Academic Purposes IV	3	0	3
IE220	Probability and Statistics	3	0	5
MATH276	Differential Equations	4	0	6

<b>5 th Semester</b>				
ISE311	Internet Programming	2	2	5
	Area Elective (2)	3	0	5
ISE399	Summer Praticce I	0	0	6
CMPE341	Database Design and Management	3	2	7
ISE353	Information Systems Development	3	0	10
ENG301	English for Occupational Purposes I	3	0	3
<b>6 th Semester</b>				
ENG302	English for Occupational Purposes II	3	0	3
SE328	Algorithms and Optimization Methods	3	0	5
SE346	Software Engineering	3	1	6
CMPE338	Computer Networks and Operating Systems	3	2	6
ISE332	IT Infrastructure and Architecture	3	0	5
ISE314	Data Warehousing and Mining	3	0	5
<b>7 th Semester</b>				
	Area Elective (1)	3	0	5
	Area Elective (3)	3	0	5
ISE499	Summer Practice II	0	0	10
	Area Elective (4)	3	0	5
	General Elective	3	0	4
TURK401	Turkish Language I	2	0	2
ISE493	Project Orientation	2	0	5
	General Elective	3	0	4
<b>8 th Semester</b>				
ISE426	Computer Security	3	0	5
TURK402	Turkish Language II	2	0	2
	Area Elective (5)	3	0	5
ISE494	Senior Project	4	0	9
	General Elective	3	0	4
	Area Elective (6)	3	0	5

AET 306	Area Elective Course	(0-0)6
AET 307	Area Elective Course	(0-0)7
AET 315	Area Elective Course	(0-0)5
AET 316	Area Elective Course	(0-0)6
AET 317	Area Elective Course	(0-0)7
AET 325	Area Elective Course	(0-0)5
AET 326	Area Elective Course	(0-0)6
AET 335	Area Elective Course	(0-0)5
AET 336	Area Elective Course	(0-0)6
AET 345	Area Elective Course	(0-0)5
AET 346	Area Elective Course	(0-0)6
AET 355	Area Elective Course	(0-0)5
AET 356	Area Elective Course	(0-0)6
AET 365	Area Elective Course	(0-0)5
AET 366	Area Elective Course	(0-0)6
AET 376	Area Elective Course	(0-0)6
AET 386	Area Elective Course	(0-0)6
AET 396	Area Elective Course	(0-0)6
AET 405	Area Elective Course	(0-0)5
AET 406	Area Elective Course	(0-0)6
AET 415	Area Elective Course	(0-0)5
AET 416	Area Elective Course	(0-0)6
AET 425	Area Elective Course	(0-0)5
AET 426	Area Elective Course	(0-0)6
AET 435	Area Elective Course	(0-0)5
AET 436	Area Elective Course	(0-0)6
AET 445	Area Elective Course	(0-0)5
CMPE 236	Introduction to Microprocessors and Microcontrollers	(3-2)8
CMPE 312	Visual Programming	(2-2)5
CMPE 318	Java Programming	(2-2)5
CMPE 323	Algorithms	(3-0)7

CMPE 326	Formal Languages and Automata	(3-0)6
CMPE 343	Database Systems and Programming	(2-2)5
CMPE 363	Introduction to Machine Learning	(2-2)5
CMPE 376	Computer Games and Simulation	(2-2)5
CMPE 413	Logic Programming	(3-0)5
CMPE 424	Language Processors	(3-0)5
CMPE 430	Fundamentals of Deep Learning	(2-2)5
CMPE 432	Virtualization	(3-0)5
CMPE 433	Cloud Computing and Virtualization	(3-0)5
CMPE 434	Embedded System Design	(2-2)5
CMPE 435	Special Topics in Computer Networks	(3-0)5
CMPE 437	VLSI Design	(2-2)5
CMPE 461	Applied Neural Computing	(2-2)5
CMPE 462	Introduction to Artificial Intelligence	(3-0)5
CMPE 463	Digital Signal Processing	(3-0)5
CMPE 464	Digital Image Processing	(3-0)5
CMPE 465	Knowledge Engineering	(3-0)5
CMPE 466	Soft Computing	(3-0)5
CMPE 467	Pattern Recognition	(3-0)5
CMPE 468	Machine Learning for Engineers	(3-0)5
CMPE 473	Computer Graphics	(2-2)5
E 400	Undergraduate Research Project	(3-0)5
ECON 101	Introduction to Economics I	(3-0)5
ECON 102	Introduction to Economics II	(3-0)5
EE 203	Digital Circuits and Systems	(3-2)6
EE 449	Pattern Classification and Sensor Applications for Engineers	(3-0)5
ENE 303	Modeling, Analysis and Simulation	(3-1)5
ENE 308	Solar Energy Technology	(3-1)5
ENE 312	Wind Energy Technologies	(3-1)5
ENE 430	Energy Systems in Buildings	(3-0)5
IE 314	Project Management	(3-0)5

IE 320	Business Process Reengineering	(3-0)5
IE 322	Industrial Engineering Practices in Energy Sector	(3-0)5
IE 411	Work Study and Design	(3-0)5
IE 415	Industrial Economics	(3-0)5
IE 416	Expert Systems	(3-0)5
IE 418	Decision Analysis	(3-0)5
IE 419	Service Systems	(3-0)5
IE 421	E-Commerce and ERP	(3-0)5
IE 422	Customer Relationship Management	(3-0)5
IE 423	Managemet and Organization	(3-0)5
IE 425	Analysis of Investment Projects	(3-0)5
IE 427	Strategic Management	(3-0)5
IE 428	Introduction to Systems Engineering	(3-0)5
IE 429	Reliability	(3-0)5
IE 443	Occupational Health and Safety	(3-0)5
IE 444	Decision Support Systems	(3-0)5
IE 445	Technology Management	(3-0)5
IE 446	Innovative Products Services and Systems	(3-0)5
IE 447	Technology Entrepreneurship	(3-0)5
ISE 301	Multimedia Systems	(3-0)5
ISE 308	Introduction to Mobile Application Development	(3-0)5
ISE 405	Foundations in Information Technology Services	(3-0)5
ISE 413	Web Application Development with .NET	(2-2)5
ISE 414	Investigation of Computer Crime	(3-0)5
ISE 422	E-Government	(3-0)5
ISE 423	Technology Trends in E-Government	(3-0)5
ISE 424	Distance Education and E-Learning	(3-0)5
ISE 432	Innovation and Entrepreneurship in IT	(3-0)5
ISE 434	Fundamentals of the Internet of Things	(3-0)5
ISE 481	CO_OP Practice I	(3-0)5
ISE 483	CO_OP Practice II	(3-0)5

MAN 111	Introduction to Business	(3-0)6.5
MAN 112	Introduction to Management	(3-0)6
MAN 206	Organizational Behavior	(3-0)6
MAN 213	Organization Theory	(3-0)5
MAN 214	Quantitative Analysis	(3-0)5
MAN 303	Financial Management I	(3-0)6
MAN 317	Human Resources Management	(3-0)5
MAN 401	Managerial Accounting	(3-0)7
MAN 414	Entrepreneurship and Business Plan	(3-0)5
MAN 424	Financial Statement Analysis	(3-0)6
MAN 440	Dijital Pazarlama	(3-0)5
MAN 444	Project Management	(3-0)6
MAN 448	Marketing Research	(3-0)7
MATE 458	Materials for Catalysis and Fuel Cells	(3-0)5
MATE 460	Biomaterials	(3-0)5
MATE 462	Nanomaterials	(3-0)5
MATH 380	Numerical Methods for Engineers	(3-1)5
ME 488	Production Design and Prototyping	(1-4)5
MECE 322	Multidisciplinary Design in Engineering	(2-2)5
MECE 422	Multidisciplinary Engineering Design	(2-2)5
MFGE 405	Rapid Prototyping	(3-0)5
MFGE 420	Project Management in Manufacturing	(3-0)5
MFGE 481	Nanofabrication	(3-0)5
MFGE 482	Introduction to CAD/CAM	(2-1)5
SE 321	Object-Oriented Analysis and Design	(3-0)7
SE 340	Rapid Application Development	(2-0)5
SE 360	System Modeling and Simulation	(3-0)5
SE 362	Open Source Software Development	(2-2)5
SE 375	3D Modeling, Animation and Game Design	(2-2)5
SE 421	Big Data Programming	(2-2)5
SE 422	Introduction to Data Science	(3-0)5

SE 426	Emerging Technologies	(2-2)5
SE 427	Blockchain and Cryptocurrency Technologies	(2-2)5
SE 440	Analysis and Design of User Interfaces	(3-0)5
SE 446	Introduction to Bioinformatics	(3-0)5
SE 450	Software Engineering Ethics	(3-0)5
SE 453	Large Scale Software Development	(3-0)5
SE 457	Secure Software Development	(3-0)5
SE 460	Software Construction	(3-0)5
SE 461	Software Patterns	(3-0)5
SE 462	Formal Methods in Software Engineering	(3-0)5
SE 463	Low-code Application Development	(3-0)5
SE 470	Agile Methods in Software Development	(2-2)5

## Course Descriptions

CHE 105	General Chemistry	(3-2)5
---------	-------------------	--------

Matter and measurement, atoms, molecules and ions, stoichiometry: calculations with chemical formulas and equations, oxidation-reduction reactions, thermochemistry, electronic structure of atoms, periodic properties of the elements, basic concepts of chemical bonding, molecular geometry and bonding theories, gases, intermolecular forces, liquids and solids, chemical kinetics, chemical thermodynamics, electrochemistry.

CMPE 109	Fundamentals of Computing	(2-1)2.5
----------	---------------------------	----------

Engineering fundamentals, computer engineering as a profession, career opportunities, professional organizations for computer engineering, ethical issues in computing; hardware components of a computer system; data representation and machine language instructions; coordinating internal activities of a computer using operating systems; networking

CMPE 113	Computer Programming I	(2-2)4
----------	------------------------	--------

Algorithm development, fundamental elements of the C language, selection statements, iteration statements, standard library functions, user-defined functions, parameter passing, application programs in a laboratory environment using the C language.

CMPE 114	Computer Programming II	(3-2)5
----------	-------------------------	--------

Pointers, dynamic memory management, parameter passing, arrays, strings, structures, file processing; application programs in a laboratory environment using the C language.

CMPE 225	Object-Oriented Programming	(3-2)8
----------	-----------------------------	--------

Data types, expressions and statements, functions and scope rules, class definitions, inheritance, polymorphism, name overloading, templates, exception handling; input/output; object oriented principles using the UML and C++ programming language.

CMPE 226      Data Structures      (3-0)8

Stacks, recursion, queues; creation and destruction of dynamic variables, serial linked lists, circular lists, doubly linked lists, circular doubly linked lists; sorting and searching algorithms, space and time considerations, binary trees, binary search trees, tree traversal algorithms, binary tree sorting algorithms, hashing.

CMPE 236      Introduction to Microprocessors and Microcontrollers      (3-2)8

Introduction to microcontrollers, instruction set, serial port operation, interrupt operation, assembly language programming, program structure and design, tools and techniques for program development, design and interface examples in assembly, design and interface examples.

CMPE 251      Discrete Computational Structures      (3-0)7

Basic mathematical objects of computational mathematics: sets, sequences, relations, functions, and partitions; deductive mathematical logic proof techniques; discrete number systems; induction and recursion; graphs and sub-graphs; trees; planarity of graphs; covering problems; path problems; directed graphs; combinatorics.

CMPE 312      Visual Programming      (2-2)5

Review of object-oriented programming, visual programming basics such as value types, operator overloading, exception and event handling; using GUI frameworks; working with files and data access by using XML.

CMPE 318      Java Programming      (2-2)5

Java technology, object-oriented programming, objects, classes, modularity; encapsulation, polymorphism, elements of Java, exceptions, garbage collector; classes and inheritance; interfaces; the collections framework; the input/output framework; the graphical user interfaces framework; threads.

CMPE 323      Algorithms      (3-0)7

Design and analysis of algorithms, O-notation, divide and conquer algorithms, dynamic programming, backtracking and branch and bound, lower bound theory, complexity of sorting and searching algorithms, graph algorithms, NP-hard and NP-complete problems, basic NPC problems, proving problems to be NPC, analysis of some string processing algorithms.

CMPE 326      Formal Languages and Automata      (3-0)6

Languages and their representations, finite automata and regular grammars, context-free grammars, concept of abstract machines and language acceptance, deterministic and non-deterministic finite state machines, pushdown automata, Turing machines and introduction to the theory of computation.

CMPE 338      Computer Networks and Operating Systems      (3-2)6

Basic concepts of computer networking, UDP and TCP services, reliability in data communication, network layer addressing, segment, datagram, frame structures, processes, scheduling algorithms, deadlock detection algorithms, semaphores, basic virtual memory structure and page replacement algorithms.

CMPE 341      Database Design and Management      (3-2)7

Database system concepts, data modeling with ER and EER, the relational data model, file organizations and index structures, relational algebra, structured query language (SQL); database design: functional dependence and table normalization; introduction to database administration; a relational DBMS in a

laboratory environment.

CMPE 343 Database Systems and Programming (2-2)5

Concurrent operations on databases; transaction processing and concurrency control; DB recovery, security and authorization; introduction to DB programming, object-oriented DB concepts.

CMPE 363 Introduction to Machine Learning (2-2)5

Artificial intelligence, machine learning, Supervised and Unsupervised Learning, Binary classification, Multiclass classification, Regression, Clustering, Model Evaluation Metrics and Scoring

CMPE 376 Computer Games and Simulation (2-2)5

History of games and current trends in games, the main concepts on game design and development, evaluating commercial games; main game design issues; creating simulations; using artificial intelligence in games; using physics and mathematics in games; main computer graphics concepts used in games; human computer interaction concepts for developing

CMPE 413 Logic Programming (3-0)5

Lisp programming: symbolic expressions, elementary functions, Lambda notation, forms, functions, list structures, Prolog programming: facts, rules, relationships; data structures; backtracking; input/output; built-in predicates.

CMPE 424 Language Processors (3-0)5

Fundamental concepts of compilation and interpretation; single-pass and multiple-pass language translators; lexical analyzer; top-down parsing, and LL(1) grammars; recursive descent method; bottom-up parsing; shift reduce technique; operator precedence grammar, LR(0) and SLR(1) grammars; syntax directed translation; error processing and recovery; s

CMPE 430 Fundamentals of Deep Learning (2-2)5

Artificial intelligence, machine learning, and deep learning, mathematical building blocks of neural networks, binary classification, multiclass classification, regression, deep learning for computer vision.

CMPE 432 Virtualization (3-0)5

Types of virtualization, hardware virtualization, hypervisors, server virtualization, desktop virtualization, storage virtualization, application virtualization, OS virtualization requirements and techniques, benefits and costs, security issues.

CMPE 433 Cloud Computing and Virtualization (3-0)5

Cloud description, types of cloud, services, deployment models, types of virtualization, hardware virtualization, hypervisors, OS virtualization, server virtualization, desktop virtualization, storage virtualization, application virtualization, benefits and costs, security issues.

CMPE 434 Embedded System Design (2-2)5

Embedded systems and their applications, metrics of embedded systems, components of embedded systems, realization of embedded systems, PCB technologies, simulation, emulation, rapid prototyping, testing and certification examples of realizations optimized for different applications, analysis of

development costs and times, laboratory work on specif

CMPE 435 Special Topics in Computer Networks (3-0)5

Elaborate concepts of TCP/IP computer networks; application details for well-known applications on the Internet. IPv6 addresses; routing principles and routing algorithms; ICMP communication; VPNs; wireless-networking; network security.

CMPE 437 VLSI Design (2-2)5

Basic fabrication sequence of ICs, self aligned silicon gate, NMOS and CMOS technologies; design rules and layout; memories and registers; full custom and semi-custom ICs; standard cells, gate arrays, FPGAs and PLDs. CAD tools for design of ICs; high level design of ICs using VHDL; low power IC design.

CMPE 461 Applied Neural Computing (2-2)5

Introduction to neural networks, perceptron learning rules, backpropagation algorithms, generalization and overtraining, adaptive linear filters, radial basis networks, self organizing networks, learning vector quantization, recurrent networks.

CMPE 462 Introduction to Artificial Intelligence (3-0)5

Agent Paradigm, Problem Solving by Searching, Informed/Uninformed Search Methods, Genetic Algorithms, Simulated Annealing, Constraint Satisfaction Problems, Adversarial Search, Ant Colony Optimization, Particle Swarm Optimization, Artificial Bee Colony Optimization, Multi-Agent Systems & Intelligent Agents, Multi-Agent Interactions, Philosophical Foundations & Ethics.

CMPE 463 Digital Signal Processing (3-0)5

Discrete-time domain and frequency domain representation of signals and systems; sampling and reconstruction; DFT, FFT, z - transform, filter design techniques; finite word length effects; 2-D filtering; applications of DSP; programming of some DSP processors.

CMPE 464 Digital Image Processing (3-0)5

Introduction to signal and image processing, introduction to digital image processing, sampling, reconstruction, and quantization, digital image representation, image transforms, enhancement, restoration, segmentation and description.

CMPE 465 Knowledge Engineering (3-0)5

Knowledge representation methods: rule-based, graph-based, logic-based methods, introduction to Prolog, knowledge acquisition, expert systems, ontology, semantic web, introduction to machine learning.

CMPE 466 Soft Computing (3-0)5

Biological and artificial neurons, perceptron and multilayer perceptron; ANN models and learning algorithms; fuzzy sets and fuzzy logic; basic fuzzy mathematics; fuzzy operators; fuzzy systems: fuzzifier, knowledge base, inference engine, and various inference mechanisms such as Sugeno, Mamdani, Larsen etc., composition and defuzzifier.

CMPE 467 Pattern Recognition (3-0)5

Bayes? decision theory, classifiers, discriminant functions and decision surfaces, estimation of parameters, hidden Markov models, nearest neighbor methods; linear discriminant functions; neural networks; decision

trees; hierarchical clustering; self organizing feature maps.

CMPE 468      Machine Learning for Engineers      (3-0)5

Artificial intelligence, machine learning, supervised and unsupervised learning, binary classification, multiclass classification, regression, clustering, model evaluation.

CMPE 473      Computer Graphics      (2-2)5

Hardware and software components of graphic systems; output and filled data primitives; 2D and 3D geometric transformation; 2D and 3D viewing pipelines; visible-surface detection methods.

E 400          Undergraduate Research Project      (3-0)5

Rigorous scholarly research, research methodologies, review of background knowledge, academic reading.

ECON 101      Introduction to Economics I      (3-0)5

Introduction to demand, supply and market price formation; household behaviour; elasticity; production process; profit maximizing firm behavior; different market types such as monopoly, perfect competition, oligopoly.

ECON 102      Introduction to Economics II      (3-0)5

Aggregate demand, aggregate supply, unemployment, inflation, aggregate expenditure, aggregate income models, fiscal policy, money demand, money supply, monetary policy, multiplier.

EE 203          Digital Circuits and Systems      (3-2)6

Number systems and codes, Boolean algebra and logic gates, minimization of Boolean functions, combinational circuits, design of combinational circuits using SSI and MSI components, flip-flops, analysis and design of sequential circuits, counters, shift registers, memory elements, programmable logic devices (PLD), design with PLDs. Introduction to

EE 449          Pattern Classification and Sensor Applications for Engineers      (3-0)5

Sensors, general information about sensor types and sensor working principles; what is a pattern; pattern classification applications; theory and methods of pattern classification; feature extraction and selection; MATLAB Classification Learner Tool; analysis and performance of classifiers; RFID basics.

ENE 303          Modeling, Analysis and Simulation      (3-1)5

Translational mechanical systems, state-variable equations, inputoutput equations, matrix formulation, block diagrams and computer simulation, rotational mechanical systems, electrical systems, Laplace transform solutions of linear models.

ENE 308          Solar Energy Technology      (3-1)5

Introduction to solar energy conversions, fundamentals of solar radiation, methods of solar collection and thermal conversion, solar heating systems, solar thermal power, capturing solar energy through biomass.

ENE 312 Wind Energy Technologies (3-1)5

Wind characteristics, wind energy, wind turbines, design of wind turbines, projecting, planning and economy, wave energy and wave energy conversion systems.

ENE 430 Energy Systems in Buildings (3-0)5

Building structure, heating, ventilation and air conditioning, the calculation of heat loss and insulation surfaces, water, fuel and electricity consumption in buildings, the national and international standards and regulations on energy efficiency in buildings.

ENG 101 English For Academic Purposes I (4-0)3.5

English language skills, especially academic skills, such as reading comprehension, vocabulary building and critical analysis of texts; listening and note-taking, class discussions, presentations, writing, research assignments and use of technology.

ENG 102 English for Academic Purposes II (4-0)3.5

Academic skills such as reading comprehension, class discussions, use of academic vocabulary and critical analysis of texts; research assignments and review of the English language structure; skills such as listening and note-taking, analysis of written products, writing, presentation and use of technology.

ENG 201 English for Academic Purposes III (3-0)3

Advanced reading and writing skills, applying critical reading skills and strategies, identifying the organization of a reading text, main ideas of the texts, and the author's main purpose, summarizing a given text, outlining and writing an argumentative essay.

ENG 202 English for Academic Purposes IV (3-0)3

Preparing and writing research reports and delivering effective oral/written informative and persuasive presentations; gathering information, organizing data, outlining, using appropriate techniques in presentation and delivering for a maximum impact, using visual aids and citation effectively.

ENG 301 English for Occupational Purposes I (3-0)3

Job-related communication skills; the functions such as describing relationships at work, discussing performance reviews and giving feedback, discussing plans and arrangements, using social media for professional communication, discussing on recruitment tests and job interviews, presenting a service or product, writing reviews on websites

ENG 302 English for Occupational Purposes II (3-0)3

More detailed job-related communication skills; describing and organizing meetings, developing communicational styles in various cultural settings, handling mistakes and apologizing, getting familiar with marketing styles and advertising, deciding how to adapt and market a product in different countries,

HIST 101 Principles of Atatürk and History of Turkish Revolution I (2-0)2

French Revolution; structure and geopolitical positioning of Ottoman Empire, reasons of its decline; Westernization movements, First and Second Constitutional Monarchy declarations; Libya and Balkan wars; First World War; period before the War of Independence, congresses, National Pact, establishment of Turkish Grand National Assembly.

HIST 102 Principles of Atatürk and History of Turkish Revolution II (2-0)2

War of Independence; Lausanne Treaty; declaration of the Republic; removal of sultan rule and caliphate; Atatürk's revolutions; establishment of national economy; Second World War, before and after; Turkish Republic after 1960.

HIST 221 History of Civilization (3-0)3

A chronological order of the rise of civilizations from Sumer until the Scientific Revolution.

IE 220 Probability and Statistics (3-0)5

Introduction to probability and statistics; random variables and probability distributions; expected value; sampling distributions; one and two sample estimation problems; test of hypotheses; simple linear regression.

IE 314 Project Management (3-0)5

Elements and phases of project management; functions (planning, staffing, scheduling, monitoring, and control) and techniques (CPM, PERT, etc.) of project management; software tools for project management; project cost control and time/resource management; leadership styles, conflict and risk management.

IE 320 Business Process Reengineering (3-0)5

Identifying, mapping, measuring, objectively analyzing and improving business processes and practices within enterprise and across enterprise boundaries with customers, suppliers and business partners; best practices, supporting techniques and practical knowledge gleaned from the experience of numerous real-world projects.

IE 322 Industrial Engineering Practices in Energy Sector (3-0)5

The impact of energy in today's world; principles of energy planning and utilization; the drives of energy supply and demand; the role of an engineer in energy industries for management, resource planning and utilization; sustainability as a driving force for energy planning; common concepts in energy management; a paradigm of decision making: conventional versus new energy resources including nuclear and renewable energy; economical evaluation of energy investments,

IE 411 Work Study and Design (3-0)5

Introduction to work study, concepts of affectivity and efficiency, meanings of method study and work measurement and how they are related, methodology for a work study project, measurement, observation and recording tools and techniques, integration with concepts of waste elimination, work simplification, lean production, cost and creation of perf

IE 415 Industrial Economics (3-0)5

Competitive markets, real world institutions, and the internal organization of firms; price discrimination; vertical control; oligopoly theory; product differentiation under oligopoly; entry, entry deterrence and predation; new empirical industrial organization; non-cooperative game theory.

IE 416 Expert Systems (3-0)5

Technology of expert systems and applications; development of a simple expert system; artificial intelligence concepts, heuristics, problem solving, intelligent attributes; use of expert systems in industry;

IE 443 Occupational Health and Safety (3-0)5

Basic information on occupational health and safety, principles and legislations, occupational health and safety requirements to be applied in the workplace, occupational accidents, risk assessment and occupational audits; a proactive approach to occupational health and safety.

IE 444 Decision Support Systems (3-0)5

Decision support systems and business intelligence, decision making, systems, modeling and support, decision support systems concepts, methodologies and technologies, modeling and analysis, data warehousing, business analytics and data visualization, data, text and web-mining, business performance management, decision support system applications

IE 445 Technology Management (3-0)5

The topics covered

- a) identifying the strategic issues in technology management (TM);
- b) identifying the issues in organizing TM functions and related human element ;
- c) identifying the issues in TM-Activities and Tools
- d) being able to identify, formulate and solve TM problems.

IE 446 Innovative Products Services and Systems (3-0)5

Innovation, innovative products, services and systems; innovative organizations, products, services and systems or any topic involving design, development and innovation.

IE 447 Technology Entrepreneurship (3-0)5

Technology Entrepreneurship course aims to enable students to learn variety of basic areas and concepts of entrepreneurship including idea generation, business plan creation, venture financing sources, marketing and go to market strategies and to apply the concepts learned through real life cases and a term project.

ISE 102 Introduction to Management Information Systems (3-0)3.5

Principles and concept in business information systems: resource management, customer relationship, supply chain management, legal and professional issues; strategic impact of information systems; project management issues: project selection, scheduling, control and evaluation.

ISE 261 Business and e-Commerce (3-0)6

A context for developing e-Commerce applications; types of e-Commerce applications; identifying and describing e-commerce applications; e-commerce feasibility; e-commerce requirement analysis; high-level, detailed and technical design and construction; e-business models; Internet marketing; online monetary transactions; Internet taxation; legal

ISE 301 Multimedia Systems (3-0)5

Multimedia terminology and concepts, multimedia data types (digital image, audio, video); multimedia editing for different multimedia types.

ISE 308 Introduction to Mobile Application Development (3-0)5

Mobile devices, mobile platforms, mobile operating systems, mobile programming, user interface design in mobile devices; data store in mobile platform, map and location-based services, telephony and SMS, sensors.

Project analysis and design, project development, project management, team working, project presentation.

ISE 499 Summer Practice II (0-0)10

A minimum of six weeks of training in an IT department/company involving the observation of the hardware and software components of a computer system.

KRY 111 Career Planning (1-0)1

Being a student at Atilim University, Student-centered programs at Atilim University, Faculty, Department presentations, Career Planning and Coop Program, Erasmus, CV writing types, Interview techniques, Effective Communication and presentation techniques, Intelligence and Personality

MAN 111 Introduction to Business (3-0)6.5

Fundamentals of business, global business, small business, forms of business, functions of business namely, management and organization, and information technology.

MAN 112 Introduction to Management (3-0)6

Organization, teamwork, technology and information management, production, operations management, human resources, marketing, accounting and finance.

MAN 206 Organizational Behavior (3-0)6

Organizational behavior in historical and global context, individuals in organizations, personality, motivation, groups, communication, leadership, conflict, organizational system, organizational structure, technology and job design, socio-technic system, organizational culture, organizational change and development.

MAN 213 Organization Theory (3-0)5

Fundamental concepts of organization structure and design; the evolution of organization theory, organizational effectiveness, organizational structure and environment.

MAN 214 Quantitative Analysis (3-0)5

Quantitative approaches to decision making; prior, posterior, pre posterior analysis; linear programming, transportation, assignment, network analysis, inventory models, queuing models, Markov chains.

MAN 303 Financial Management I (3-0)6

The cash flow, ratio analysis, the time value of money, stock and bond valuation, capital budgeting, project analysis, operating leverage.

MAN 317 Human Resources Management (3-0)5

Strategic human resource management, certain ethical, legal and social considerations, staffing, human resource development, compensation and benefits, safety and health, employee and labor relations.

and emerging technologies.

MATH 151      Calculus I      (4-2)7

Preliminaries, limits and continuity, differentiation, applications of derivatives, L'Hopital's Rule, integration, applications of integrals, integrals and transcendental functions, integration techniques and improper integrals, sequences.

MATH 152      Calculus II      (4-2)7

Infinite series, vectors in the plane and polar coordinates, vectors and motions in space, multivariable functions and their derivatives, multiple integrals: double integrals, areas, double integrals in polar coordinates, triple integrals in rectangular, cylindrical and spherical coordinates, line integrals, Independence of path, Green's theorem.

MATH 275      Linear Algebra      (4-0)6

Linear equations and matrices, real vector spaces, inner product spaces, linear transformations and matrices, determinants, eigenvalues and eigenvectors.

MATH 276      Differential Equations      (4-0)6

First-order, higher-order linear ordinary differential equations, series solutions of differential equations, Laplace transforms, linear systems of ordinary differential equations, Fourier analysis and partial differential equations.

MATH 380      Numerical Methods for Engineers      (3-1)5

Solution of nonlinear equations, solution of linear systems, eigenvalues and eigenvectors, interpolation and polynomial approximation, least square approximation, numerical differentiation, numerical integration.

ME 488      Production Design and Prototyping      (1-4)5

Introduction to basic mechanical concepts, mechanical behavior of basic structural elements; introduction to basic materials science and basic manufacturing methods; introduction to mechanical and physical properties of materials; introduction to basic manufacturing processes and casting and material forming; basic design factors (line, figure, color, material, texture, design field, form, value in lighting), ergonomics/anthropometry; meaning in design; design project development by drawing and prototyping.

MECE 322      Multidisciplinary Design in Engineering      (2-2)5

An overview of systems engineering (V-Model); engineering design process and methodology; needs assessment; project planning; literature review and patent survey; design criteria and constraints; creativity and idea generation; decision making for idea selection; methods and tools of functional decomposition; product/system architecture; modelling and simulation

MECE 422      Multidisciplinary Engineering Design      (2-2)5

Design process and methodology; identification of engineering disciplines, features and importance of multidisciplinary engineering design; systems engineering; need identification and assessment, problem definition; creativity and idea generation; methods and tools of functional/physical/task decomposition; design representation techniques, conceptual modeling of energy, information and material flow in technical systems; idea selection, decision schemes; product architecture

MFGE 405      Rapid Prototyping      (3-0)5

Rapid prototyping technologies, CAD models suitable for automated fabrication, secondary processing, additive manufacturing technologies, stereolithography, fused deposition modeling, laminated object manufacturing, selective laser sintering, direct metal laser sintering, casting processes for rapid prototyping, investment casting, rapid tooling, reverse engineering.

MFGE 420      Project Management in Manufacturing      (3-0)5

Project management standards; project, portfolio, program and operation management concepts; managing participation, teamwork, and conflict; need identification and assessment, problem definition; creativity and idea generation; methods and tools of functional/physical/task decomposition; mind mapping; planning methods; cost estimation and budgeting; time management and scheduling; project quality management; resource allocation; project risk management techniques; project execution, monitoring techniques

MFGE 481      Nanofabrication      (3-0)5

Fabrication of metallic nanomaterials, manufacturing of carbon based nanostructures, nanostructured systems from low-dimensional building blocks, characterization techniques and manufacturing methods, proximity effect.

MFGE 482      Introduction to CAD/CAM      (2-1)5

Introduction to CAD, overview of geometric modeling techniques (wireframes, boundary representation, constructive solid geometry and hybrid modelers), parametric and variation modeling, parametric modeling of curves and surfaces (Bezier, B-spline and NURBS), introduction to CAM, CNC part programming, machining strategies, cutting tool selection, tool path generation, post-processing.

PHYS 101      General Physics I      (3-2)6

Measurement, motion along a straight line, vectors, motion in two and three dimensions, force and motion I, force and motion II, kinetic energy and work, potential energy and conservation of energy, center of mass and linear momentum, rotation, rolling, torque, and angular momentum, equilibrium and elasticity.

PHYS 102      General Physics II      (3-2)6

Electric charge, electric fields, Gauss' law, electric potential, capacitance, current and resistance, circuits, magnetic fields, magnetic fields due to currents, induction and inductance.

SE 212      Human-Computer Interaction      (3-0)8

Basic principles of user interfaces, human capabilities and limitations; usability paradigms and principles, user and task analysis, design process, prototyping and evaluation, color and typography, new user interface technologies.

SE 321      Object-Oriented Analysis and Design      (3-0)7

Fundamentals of object-orientation, object-oriented (OO) modeling using UML, Experimentation in OO analysis: identification of use cases and objects, experimentation in OO design: class hierarchies, implementation in OO programming, design pattern (overview), case study to reinforce the underlying concepts.

SE 328      Algorithms and Optimization Methods      (3-0)5

Design and analysis of algorithms; mathematical complexity of algorithms; master theorem; decrease-and-conquer; divide-and-conquer; transform-and-conquer; introduction to some optimization techniques;

SE 463            Low-code Application Development            (3-0)5

Introduction to low-code development. Low-code platform interfaces and properties. Creating applications using a low-code platform. Preparing a web and mobile UI and screen prototype via a low-code platform. Create scheduled jobs. Publishing applications and testing.

SE 470            Agile Methods in Software Development            (2-2)5

Introduction to agile methods, eXtreme Programming (XP), Lean, Scrum, Crystal, feature-driven development (FDD), Kanban; dynamic systems development method (DSDM); architecture and design issues in agile software methods.

TURK 401        Turkish Language I            (2-0)2

Languages and their classification; history of Turkish language, its spread over the world and its place among other languages; Turkish language in the republic era; orthography; expressions; foreign words, suffixes and prefixes; punctuation; language and verbalism.

TURK 402        Turkish Language II            (2-0)2

Written expression and its genres; bibliography; sentence structure and types; misexpression; verbal expressions.
